REALVision and Hutchison Telecom Jointly Deliver Mobile Enterprise Solutions first for Hutchison Telecom users

The first mobile service provider delivering REALMobile Executive solution, a high-speed wireless data network and short message service (SMS) to keep executives always connected to corporate emails.

Hong Kong, September 24, 2001 - REALVision Technology Ltd, an innovative wireless technology provider, today announced that the company has joined forces with Hutchison Telecommunications (Hong Kong) Ltd ("Hutchison Telecom") to provide mobile enterprise solutions first for Hutchison Telecom users. This partnership will deliver REALMobile Executive, a high-speed wireless corporate email solution providing total solution collaboratively to the wireless needs of enterprises.

The REALMobile Executive package, a high-speed wireless data network and short message services (SMS), allows executives to do wireless synchronization of Personal Information Management (PIM). Featuring with advanced email alert function, REALMobile Executive sends alert SMS messages to executives whenever there are new incoming emails to their corporate email accounts. Moreover, executives can enjoy mobile online browsing with REALMobile Executive through WAP or Web access to suit for all the customers' needs.

"As the leading mobile operator in Hong Kong with superb network quality and the largest subscriber base, Hutchison Telecom has established a pioneering position in corporate and business market with the fastest 2.5G mobile service, the widest roaming coverage, as well as a new wave of wireless corporate solutions such as Wirefree Sales Management, Group Messaging, Wirefree Logistics Management, Intranet access, high-speed mobile Internet and much more," said Mr Sandroff Ma, Head of System Integration, Corporate Market, IT & eBusiness Division of Hutchison Telecom. "To meet the increasing communication needs of the business community in the new information age, we are pleased to join with REALVision, an innovative and progressive wireless solution provider, in developing the Mobile Enterprise applications for our corporate users, enabling them to further increase efficiency, business opportunities and overall competitiveness."

Vander Ng, Chief Operation Officer of REALVision said, "We are extremely pleased that Hutchison Telecom, a pioneer in the wireless communications services, has deployed REALVision's mobile enterprise solutions to provide corporate email solutions. Our partnership with Hutchison Telecom offers us an opportunity to be a leading enabler of the acceleration to the wireless community."

"REALVision has solid experience in developing mobile enterprise solutions with proven successful cases. The REALMobile Executive package we are offering with Hutchison Telecom is one of the our flagship mobile enterprise solutions," said Ng. "which is the key communication tool for executives, especially those working at government sector, banking industry and international companies will find the email alert feature extremely useful.

In addition to REALMobile Executive, REALVision also provides the following mobile enterprise solutions:

\* REALMobile Construction -- includes eight modules: Project Management, Foundation, Site Investigation, Defect Inspection, Building Maintenance, Labour Management, Safety Checking and Asset Management

\* REALMobile Delivery -- Wireless Job Assignment & Dispatching and Proof of Delivery for

#### Logistics Management

- \* REALMobile FieldService -- Mobile Field Services Automation for Inspection, Surveying & Maintenance Job Management
- \* REALMobile FleetManage -- Wireless Fleet Management Solution for Resources Monitoring
- \* REALMobile SalesForce -- Mobile Sales Force Automation for Fast-ordering & Customer Relationship Management
- \* REALMobile SmartPatrol -- Mobile Patrol and Security & Facility Inspection for Property Management

#### About REALMobile Executive

The REALMobile Executive package, a high-speed wireless data network and short message services (SMS), allows executives to do wireless synchronization of Personal Information Management (PIM), email alert and online browsing even when they are on the road or traveling.

REALMobile Executive solution allows wireless synchronization of PIM, which includes email, calendar, address book and to-do-list, even when they are on the road. Featuring with Email Alert, REALMobile Executive can send alert message by means of SMS to users' PDAs whenever their corporate email accounts (Lotus Notes or Microsoft Exchange) receive new incoming emails. The email alert function is available even you are in the roaming mode and traveling outside Hong Kong. Executives can be always connected with important email messages.

Combining the advantages of thin-client technologies, REALMobile Executive solution supports on-line browsing in the means of WAP or Web access as well as on-line synchronization by batch, to suit for all the customers' needs.
