

## Neural Technologies shortlisted in two categories of CCR Credit Excellence Award

10<sup>th</sup> Sep 2010

Neural Technologies has been selected as a finalist in the **CCR Credit Excellence Awards**, in the categories of 'Consumer Credit Management' and 'Risk'. The company was shortlisted alongside companies such as British Gas and Carphone Warehouse from hundreds of applicants.

CCR (Credit Collections & Risk) is the premier magazine for consumer and commercial credit professionals. New to 2010, their awards programme brings together "the brightest and best in the industry".

Brenda Linger, honorary vice president of the Institute of Credit Management, and judge of the Consumer Credit Management category, said, "The judges in our category found the decision to come up with just three finalists very difficult due to the high standard of the entrants and the rigorous selection process. We are confident that the finalists will bring credit to the industry".

This is the second award this month that Neural Technologies has been shortlisted for: the other being IT Supplier of the Year Award in the Organisational Excellence category of the BCS & Computing UK IT Industry Awards 2010.

Winners of the CCR award will be announced at a ceremony at the Tower Hotel, London on 5 October 2010.
