Systems Integrator Dynavar Inks Agreement to Resell Sylantro's Hosted VoIP Platform throughout the Americas

*Established Integrator to Provide Sales, System Design, Integration and Support
Services for Sylantro-Based Business and Consumer Hosted Communications*

VON FALL 2005, BOSTON, September 19, 2005 – Sylantro Systems Corp. today announced that Dynavar Corporation, a well-established systems integrator with operations throughout North, Central and South America, has standardized on the Sylantro applications feature server as the company's hosted Voice over IP (VoIP) platform. Dynavar, which has built a strong sales channel among incumbent service providers, CLECs, ISPs and large enterprises throughout its service area, will resell the Sylantro solution and provide systems design, integration and support services.

Established in 1994, Dynavar represents and/or resells a wide variety of best-of-breed technologies, and custom-tailored single- or multi-vendor solutions to meet the diverse requirements of its customers. The Sylantro agreement allows Dynavar to provide its customers with a network-hosted platform for the delivery of high-value, high-margin hosted communications services including IP Centrex, PBX-replacement services, consumer broadband voice, voice VPN, unified messaging and other innovative revenue-generating service offerings.

"Dynavar recognized that Sylantró's carrier-grade applications offer service providers unique capabilities – such as tight integration with popular desktop applications – that will allow our customers to offer more value to their consumer, small- to medium-size business and enterprise clients," said Chris Poer, executive vice president of global sales for Dynavar Networking. "Further, Sylantró's culture of technological leadership, marketing savvy and in-depth partnership commitment is highly complementary to our company vision and mission."

"Dynavar is a leading integrator of next-generation convergent solutions, with extensive experience in designing, integrating, and installing VoIP networks throughout the Americas," said David Illing, senior vice president of marketing and operations for Sylantró Systems. "Through partnership with Sylantró, Dynavar can now offer its service-provider customers the industry's leading platform for hosted, integrated communications services, with proven field deployments, support and go-to-market services."

About Dynavar Networking.

Dynavar Networking is a Systems Integrator delivering multi-vendor, customer-driven voice switching, video and data solutions across the Americas and around the world. As a well-established, debt-free company, they offer reliable, best-of-breed customized services to meet diverse customer needs. Since 1994, Dynavar has built a solid reputation for crafting integrated solutions around superior technologies. Along with a full range of solutions, Dynavar provides sales consulting, customer support, and a full range of engineering and installation services. For more information, visit Dynavar Networking at www.dynavar.com.

About Sylantró Systems Corp.

Sylantró Systems provides the premier software platform for advanced IP Centrex and hosted communications services for business, residential, wireless and other applications. The company leads the market in deployments, with carriers such as SBC, PTTs such as Swisscom, and next-generation service providers such as NuVox and Covad using the Sylantró platform. With a unique combination of advanced applications, a carrier-class platform, and proven go-to-market services, Sylantró allows service providers to rapidly deliver high-value, high-margin managed telephony services. These award-winning solutions offer business users sophisticated communications services without the cost and complexity of today's in-house PBX and key systems, and give consumers new flexibility in their communications services. Sylantró is a privately held company backed by premier investors. On the Web: www.sylantró.com
